## Sad one On top of the scene since 1997

It's not every day that you see a Stockholm writer who keeps on going on top of the scene for more than a year. To be active for a decade is really not the usual case. But actually, there aren't many things that are usual about Sad. A Stockholm writer, whose well-developed graffiti styles never disappear from the trains and who has influenced people for many years. We really felt it was time to sit down, have a serious chat and dig deep into the styles of this outspoken guy.
